

SOUTH PRODUCTION NOTES

**November 10, 2014
Day Shift**

**BASF EMPLOYEES
33 Last Recordable
499 Last Lost Time**

#1 MED / AI-4190:

Down until the vacumax rotolock can be fixed. After the flush bag, we will start with bag #1 (lot 3600) as the first bag off the extruder. Keep in mind that a respirator is required while running the extruder or hanging a bag. Also, a respirator is required in the powder room.

Keep an eye on the first few batches to be sure that all steps are performed. Keep an eye on mixer gear box Maintenance added oil to gearbox and gave to ok to run. Call maintenance if there are any issues with gear box

Midnight shift: Did not run due to the vacumax rotolock being down.

Day shift: See above

Afternoon shift: See above

#1 RC / Clean for SI-1624:

The first bag of flush was run through. Unable to get purge air set up per Kristen's instruction.

Midnight Shift: Hold. Bag of flush was run through over the weekend.
